

UTP-1500

Twisted Pair Technology

The AVE-UTP-1500 Video Adapter

Is a passive device which allows for the transmission of Video, audio and Pan & Tilt & Zoom or other modulated embedded bi-directional control signals over Unshielded Twisted Pair (UTP).

This simple device needs No tools to install, just push and hold the locking buttons, insert the wire and release.

Passive Transmitter / Receiver

What does the UTP-1500 do?

The AVE-UTP-1500 Video Adapter allows a signal to travel up to 600 Meters (2,000 Feet) in Colour using Unshielded Twisted Pair Cable UTP (CAT5 for example). The signal can be Video Images or PTZ Control Commands.

The AVE UTP-1500 Passive Transmitter / Receiver allows you to take advantage of existing cabling that may already be installed in a building, or run UTP cable instead of the more expensive and harder to manipulate Coaxial cable.
