

DTT

Date-Time-Title

Camera Overlays

The DTT single-channel Date-Time-Title overlays date, time and camera identification onto a video image, identifying precisely when and where an event has taken place. The output signal may be displayed on a monitor, recorded on a VCR/DVR, or printed on a video printer. A jumper selectable gray background highlights the characters in any lighting condition. Full 7-24V DC or AC Operation. The DTT uses a precision crystal-controlled clock for unparalleled 5 ppm accuracy and will pass video through even when the power fails. Compatible with both color and monochrome cameras NTSC/EIA or PAL/CCIR formats, its compact size and low power consumption make it perfect for portable and covert applications. Available in all US and European time and date formats and offered as a Titler Only (NTD).
